DETAILED ACTION

Response to Arguments

Applicant's arguments, in the amendment filed 5/10/2010, with respect to the rejections of claims 1-16, 18-19 under 35 U.S.C. 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

Claims 1-6, 8-16, 18-20 are currently pending. Claims 7 and 17 has been canceled. Claims 20 have been added.

Allowable Subject Matter

1. Claims 1-6, 8-16, 18-20 are allowed.

After reviewing the remarks made by the Applicant in response to the non-final office action the Examiner finds the remarks to be persuasive. The most pertinent prior art is Peters et al (US 5,715,334) and Hsieh et al (US 5,594,767). Therefore, the combination of cited references does not teach or suggest the features of claim wherein:

determining a respective additional region mask for a second of the one or more of the processed CT images, *the respective additional region mask defining an area within the second of the one or more of the processed CT images, whose elements have intensity values within the at least one predetermined intensity value range, and*

combining the first CT image or the first of the one or more processed CT images with the second of the one or more of the processed CT images, weighted by their respective region masks, whereby the enhanced CT image is provided.

No other found prior art of record teaches or fairly suggests forming region masks for each of two different CT images, respectively and combining the two CT images based on weighting of the two respective region masks.

The Examiner finds no reason or motivation to combine the above references in an obviousness rejection thus placing the application in condition for allowance.

Any comments considered necessary by applicant must be submitted on later than the payment of the issue fee and to avoid processing delays should preferably accompany the issue fee. Such submissions should be clearly labeled, comments on statement of reasons for allowance.
